

# SAPPLINGS PLANTED

**S**tudents of Bishop School and EcoFriends together planted around 275 saplings of mango, coconut, custard apple and chickoo in Amble village. Akash Bhalerao, Chairman of EcoFriends said, "The main aim was Agro forestry. To grow fruit bearing plants on fields to provide additional income to farmers, and thus not

only conserving the environment but also helping in rural development. This aim was fulfilled easily because of the enthusiasm and energy that the children put in. The villagers will now take care of the saplings." The headmaster of the Bishop school was also present at the occasion. Kids participated with great enthusiasm.
